

Guide for Starting with Donations

Server launch: 25.09.2026 at 20:00 (GMT+3), pre-start from 19:30

In the screenshots: gold frame = buy, red frame = do not buy; numbers match the captions. Screenshots were made using the English client.

Quick overview: what to buy and in what order

1. Starter promo code from the Telegram bot and connect the bot
2. 30-day Premium and Hunt Pass
3. Missions straight to level 20
4. Starter Sets: at least 1 Set 3 and Set 4
5. Collections for EXP and stats
6. Whale mode: runes, L-Coins for tattoos and gear, Black Coupons, Secret Shop Tickets, Quest Completion Coupons

Discord: <https://discord.gg/wb5dFygUaB>

Telegram bot: https://t.me/l2anonsinfo_bot

1. Pre-start

Pre-start opens 30 minutes before the server launch: you can already log in and create a character. An announcement is regularly posted in the server Discord.

After creating your character, get started right away and decide on the most useful purchases of items and services.

2. Basics: everyone needs these

Starter promo code. Get it from the server Telegram bot and activate it via Community > Services > Promo code. You receive 2* and 3* books, plus consumables.

Telegram bot. Community > Services > Connect Telegram Bot. The bot lets you manage your character while offline farming and receive notifications if your character dies or disconnects. There is also a Discord bot, but Telegram is more convenient for me.

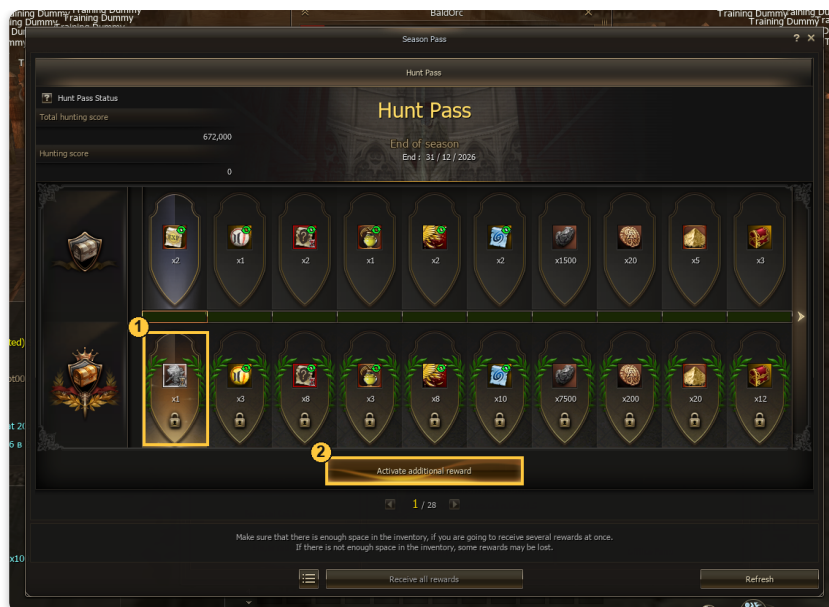

1: promo code, 2: connect Telegram bot

Premium Account (550 Lucky Coins, 30 days). A must-have: all rates x1.5 (EXP, SP, Adena, drop, spoil, quest rewards), +1% enchant and crafting chance, and it also unlocks offline farming. I recommend buying it for a full month.

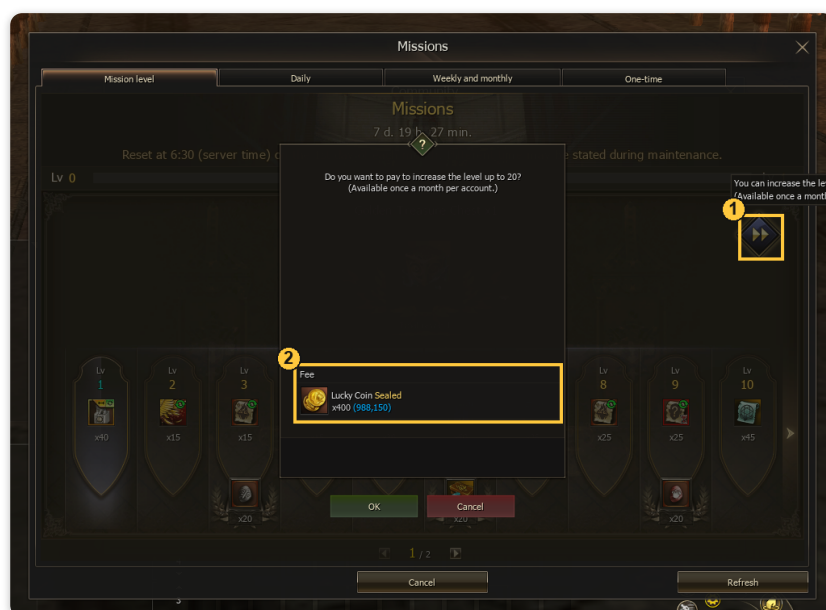

Premium: all rates x1.5, +1% enchant and crafting, 550 Lucky Coins

Hunt Pass (600 Lucky Coins). Recommended: plenty of valuable bonuses and consumables, including the Assassin Doll.

1: Assassin Doll in the premium track, 2: Hunt Pass activation

Missions (Missions > Mission Level, 400 Lucky Coins). Buy all levels up to 20 immediately (available once per month per account). You receive consumables, points, 500 Giran Seals (usable for crafting books) and 30 +3 cloaks that can later be enchanted.

1: level purchase button, 2: straight to level 20 for 400 Lucky Coins

3. Starter Sets

Community > Promotions > Growth Starter Set.

Set 1. Budget option if you do not plan to buy Set 3.

Set 2 (500 Lucky Coins). Great for consumables, dolls, and a large number of enchant scrolls that drop from Lucky Talisman Chests (12 are included). Also includes a coupon for 11 doll summons, Hidden Power boosters, potions, charges, and scrolls. If your budget allows, you can buy several sets: this will boost your dolls and later let you enchant a large part of your gear.

Set 3 (900 Lucky Coins). The core starter option; buy at least 1: coupons for an A-grade +5 weapon and 6 pieces of A-grade +5 armor, Black Ore set +4, Sylph Ring, Talisman Bracelet Lv. 3, 6 Talisman Chests and consumables. If you want to enchant gloves, boots, and your weapon, buy as many as your budget allows.

Set 4 (1,200 Lucky Coins). Covers all buff books and unlocks the 4th tattoo slot.

Sets 2, 3 and 4; frame: book for the 4th tattoo slot in Set 4

4. Collections

Community > Services > Collections.

Not all collections will be available at launch; they will unlock as the server develops. However, some strong collections can already be purchased at launch. They boost EXP and stats: attack and defense, as well as HP, CP and MP.

Collections are purchased one by one: choose the ones you need

Whale mode

Everything below is for players who want to start stronger than the rest. How much you buy depends on your budget.

5. Runes

Store in Community, rune page. Buy the entire page except the Assassin Doll:

you will get it from the Hunt Pass. The bonuses of every rune could take a long time to explain, so base it on your budget.

Runes: entire page except the Assassin Doll (you get it from Hunt Pass)

6. Exchange and L-Coin Store

In the Store, exchange Lucky Coins for L-Coins: 600,000 L-Coins = 10,000 Lucky Coins. With L-Coins

you can enchant your gear during pre-start and enter combat stronger than your opponents. The amount depends on your budget.

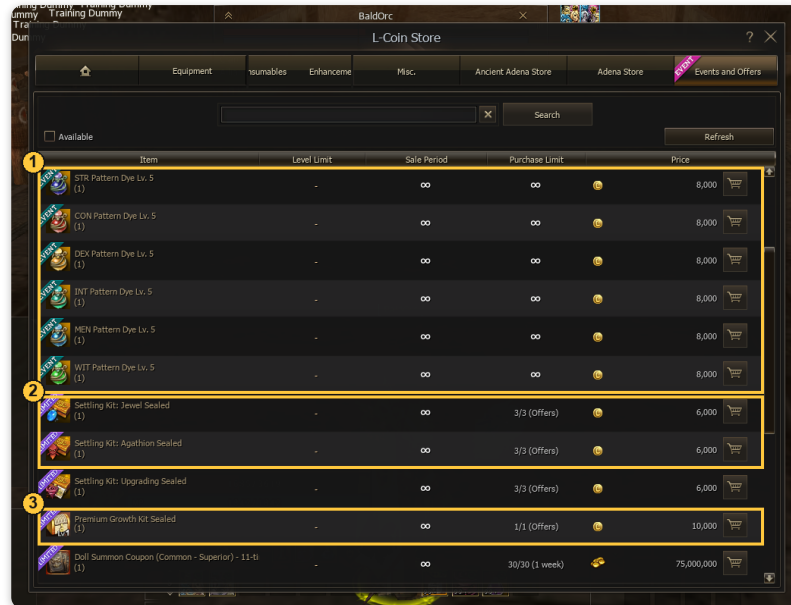

Important: enchant the gear that cannot be obtained from the Secret Shop. The Shop opens exactly one hour after the server launch.

1: 600,000 L-Coins, 2: for 10,000 Lucky Coins

After exchanging, go straight to L-Coin Store > Events and Offers and buy:

- 3 or 4 tattoos for your class (the 4th slot is unlocked by Set 4): Pattern Dye Lv. 5, 8,000 L-Coins each
- at least 1 Settling Kit: Jewel and 1 Settling Kit: Agathion (6,000 L-Coins, up to 3 each)
- optional, for extra consumables including BSOE: Premium Growth Kit (10,000 L-Coins, 1 pc.)

1: your class tattoo, 2: Settling Kits (Jewel and Agathion), 3: Premium Growth Kit

7. Store: Black Coupons and upgrades

If your budget allows, save Lucky Coins for:

- 1-2 Black Coupons: each can be exchanged for 2 3* books. This will significantly speed up your farming and expand the capabilities of any character
- Aden's Exploration Report: levels up Aden Laboratory and grants passive stats
- stabilizers for armor and weapons

8. Special Items

Secret Shop Tickets (10,000 tickets = 4,000 Lucky Coins). The best item in this section: buy as many as possible. Most of your starting boost (consumables, gear, skills) will come from the Secret Shop. If several Shops are launched, your chances of becoming one of the strongest players are extremely high.

1: 10,000 Secret Shop Tickets for 4,000 Lucky Coins, 2: Quest Completion Coupons

Coupon for Quest Completion (10 pcs. = 550 Lucky Coins).

Optional purchase: lets you complete daily and weekly missions. What it is useful for:

- Assault on Orc Fortress: 5 Magic Flames and 30 Talisman Chests.
Very important, because this mission cannot physically be completed on launch day: the assault will only start the following day.
- Quest for clearing Pagan Temple: 700 AA and 5 Transcendent Enhancement Stones.

9. What to do during pre-start

That covers the purchases; back to pre-start. During these 30 minutes after server login opens, you can already enchant armor, talismans, agathions, circlets, belts, cloaks and masks. You cannot synthesize items because that requires Adena, which you do not have at launch.

From here it depends on your class and donation budget, but again: do not enchant items that can be obtained from the Secret Shop, because they will be much cheaper there.

- Enchant agathions and possibly the Speed Talisman from the chests you receive: it will speed up farming.
- You can also enchant the Phantom Mask and Heavenly Talisman: they cannot be obtained from the Shop.
- During the game, do not forget to craft elixirs in Special Crafting: they increase stats in the Character Status section.

10. Leveling 1-70

Add the required locations to Favorites in the Teleport window in advance:

- Combat Training Zone, Lv. 15
- Death Pass, Lv. 35
- Cemetery, Lv. 45
- Plains of Glory, Lv. 58
- War-Torn Plains, Lv. 64

1: Favorites tab, 2: five leveling locations

1-25+. Combat Training Zone. There are 2 types of mobs: the red Captain gives us no EXP, so attack the Archer.

25+. Fly to Death Pass and take your class immediately after teleporting; you cannot do this in combat.

After taking your class, open Skills and quickly use the Speed and Attack/Casting Speed buffs.

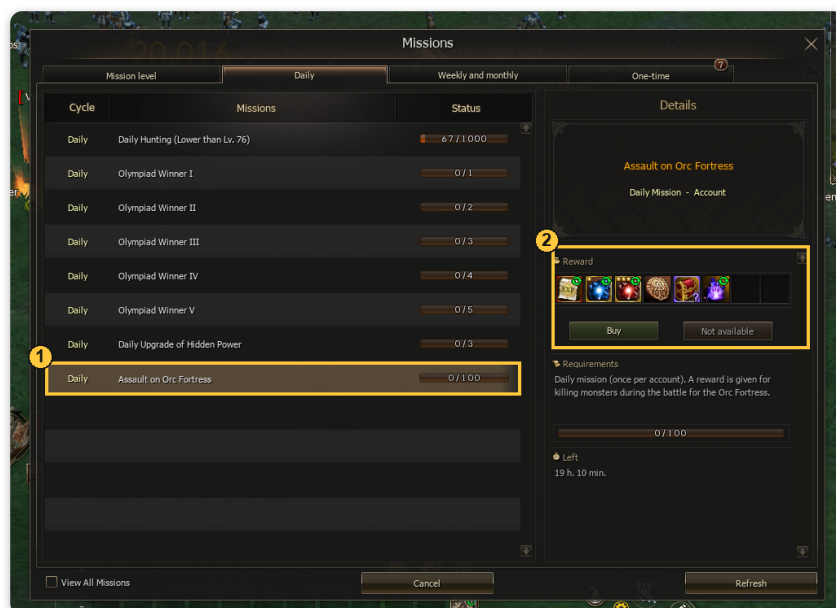

40+. Fly to Cemetery and immediately take your class there as well.

48-49. Fly to Plains of Glory, run from the teleport point and attack Vanor Silenos or Vanor Silenos Fighter:

they are the lowest-level mobs. Stay here until 60+ or all the way to 70.

Want it faster? Reach 60 and fly to War-Torn Plains: run a short distance from the teleport and kill mobs until 70.

If you have a Coupon for Quest Completion, at Lv. 60 you can already complete Assault on Orc Fortress and receive 5 Magic Flames: they significantly speed up leveling.

1: Assault on Orc Fortress, 2: reward and completion with coupon

11. Leveling 70-90

70. Fly to town, enter the Transcendent Instance Zone and select

80-90 mode. If you have extra equipment or runes, this zone should not be difficult. If your budget is limited and you do not plan to buy starting boosts, test this strategy on your class during OBT

so there are no surprises at launch.

Save L-Coins. From Lv. 75, go to Quests > Side and take Acquiring Transcendent Power.

Complete it in the same instance: kill 50 mobs. Reward: 15,000,000 EXP,

150,000 SP and an Extra Pass for the Transcendent Instance Zone.

1: Acquiring Transcendent Power quest, 2: Extra Pass reward

82-83. After 10 minutes you are back in town. With the EXP bonuses, the first run should bring you to about

Lv. 82-83. Reset the cooldown with the Extra Pass, take your class, and enter again at 85-90

for another 10 minutes.

Skills. Level the skills available to you at the same time: at least use the 2 books from the starter promo code. If you have Black Coupons, exchange them for 3* books and learn new skills that speed up farming.

Clan, 85+. Join a clan: from Lv. 85 you can make contributions (if you have L-Coins) and earn Honor Coins.

Use them to buy Dandy Balls (+100% EXP) and Magic Tablets required for leveling skills.

~87. Enchant your gear, level your skills, and fly to Water Dragon's Canyon:

run from the teleport to the right spot and farm until 89-90. After that, you can move to the eastern

part of the canyon, where the mobs are stronger.

While farming in the canyon, wait for the Secret Shop to open: get the desired gear there (talismans, circlet, belt) and the remaining books for leveling your skills.

From here, it is all up to you. Have fun!
